

"We are always looking for ways to improve our designs and provide our clients with reputable cost effective project implementation during construction. When we work on a project with Tricter Rig we are confident that the projects will be delivered with high quality, on-time and on-budget. From the constructability phase through commissioning, I know I can count on Tricter Rig to provide innovative approaches and help solve challenging construction issues. As far as I'm concerned there are two kinds of general contractors out there.... the one you want on your project and the ones you want on someone else's project. Tricter Rig is always my first call for general contractors, they are the ones you want on your project."
