

February 28, 2013

Cory,

I wanted to thank Tricter Rig for the completion of another successful project at our facility. It's always a pleasure working with you and your team on the various projects that you have done for us over the years. I have found your attention to detail on providing quotes and timely responses to be very effective in planning at our facility.

One of the most recent projects involved excavation on an old site that posed unknown issues as we progressed. The way you handled the change orders for dealing with those issues was excellent. You provided detailed photos and consultation; that helped us move forward and keep our costs under control. Tricter Rig is very experienced with installing stormwater systems and working with the various agencies that are involved in those types of projects. This goes a long way in making these projects successful and on budget!

I have found Tricter Rig to operate in a very professional manner, keeping the work site clean and tidy, following all the facility work site rules, and considerate to facility operations during construction. The crews are always very courteous and fun to work with!

I would highly recommend your services to anyone.

Thank you for helping us with our environmental systems.

Greg Will

A handwritten signature in blue ink that reads "Greg Will". The signature is fluid and cursive, written over the printed name.
